

PART 1: ROLE DESCRIPTION	
ROLE TITLE: Junior Front End Developer	
REPORTING TO: Head of Development	DIRECT REPORTS: 0
DEPT/SECTION: Development	TEAM SIZE TOTAL: 9
<p>OVERALL PURPOSE OF ROLE:</p> <p>The junior developer's role will primarily involve developing and maintaining tools and pages across our site using HTML, CSS, JavaScript, jQuery and PHP. Completed work will need to be usable across a wide range of browsers, including Internet Explorer 7 upwards and mobile devices. They will also need to develop solutions for both desktop and mobile using responsive design when and where appropriate.</p> <p>They will be responsible for testing work before release, ensuring a robust solution has been developed. They will relish working to a deadline, and delivering a good solution while working within constraints.</p> <p>They will work on projects independently as well as working with others including the front end team, design team, back end team and the editorial team.</p> <p>The role is focused on development over design, but the developer will need an eye for good design, and will know when design will improve the users' experience.</p>	
<p>MAIN ACTIVITIES/TASKS:</p> <ul style="list-style-type: none"> • Develop and maintain front end code. • Release mobile-friendly content. • Be involved with meetings within the technical team. • Communicate code and features in an understandable way. • Come up with solutions to problems. • Ensure code has been tested prior to release. • Work to and meet deadlines. • Communicate with other team members to ensure the above are achieved. 	
<p>SPECIAL REQUIREMENTS:</p> <ul style="list-style-type: none"> • NA • 	
<p>PRIME ROLE LOCATION:</p> <p>MoneySavingExpert.com Ltd, LG4 Shepherds Building, Charecroft Way, London W14 0EH</p>	
PART 2: ROLE REQUIREMENTS	

REQUIRED KNOWLEDGE & SKILLS:

The ideal candidate will have:

Essential:

- Experience of writing HTML and HTML5.
- Experience of writing CSS and CSS3.
- Experience using jQuery.
- Knowledge or experience of writing cross-browser compliant JavaScript.
- An eye for good design, both graphical and user experience.
- Knowledge of how to navigate Photoshop, and translate a design into code.

Good to have:

- Knowledge or experience of development with a server side language, preferably PHP.
- Knowledge or experience developing using object-oriented principles.
- Knowledge or experience with SASS or other CSS pre-processor.

Personal skills

- Works well in a team.
- Has good communication skills and is able to communicate with both technical and non-technical employees.
- Has good organisation skills, especially when it comes to structuring code.
- Keeps up to date with the latest advances in front end web development.
- Is self-motivated, and is able to work on projects independently.
